DWF leading
tech offering

...mobile device alerting
and awareness for
your enterprise

What is EvoNotify?

Always available instant mobile app notification tool, modular too, so use what you need and want.

Anyone, anytime with the EvoNotify app can capture near misses, accidents, submit a claim, raise a crisis alert, carry out inspections and read and digest the latest risk, policy or compliance material, all automatically distributed based on user role and need.

By having the EvoNotify app available for your teams, employees, sub-contractors or customers, you can increase engagement, reduce risk and identify trends on near misses or if/how risk assessments or compliance documents are being complied correctly.

EvoNotify, use it to raise alerts or log inspections in our Evo solutions or to your own back office risk software solutions

Choose your area of notification or alert, or use all the app modules.

Our notification app is designed to integrate with our Evo solutions as standard or with your current risk systems and can be quickly configured to adapt to each scenario. The key modules you can use to alert, notify and distribute key material are:

- Accident, incident or near miss notification
- Claim notification
- Audits / inspections
- Crisis response
- Policy, and compliance and risk assessment document distribution

Accident, incident or near miss notification

On demand easy to use capability to log incidents, accidents and never miss, a near miss.

Quick, two-step easy to use mobile capability to log real-time near misses, incidents or accidents using a simple guided form, categorised correctly, upload your pictures, videos and auto track your location.

EvoNotify ensures your log is accurate, reportable, auditable and trackable in trends.

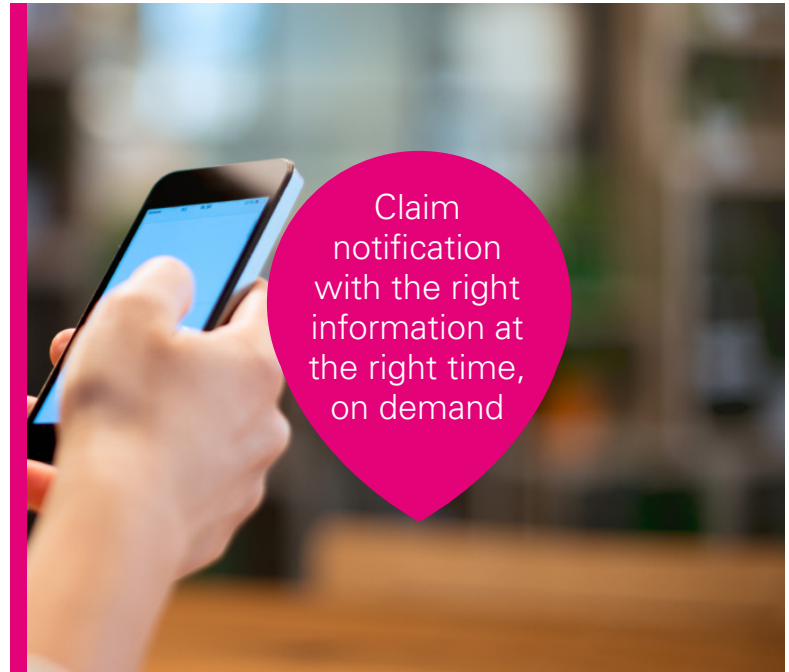

Claim notification

Easy, accurate notification of claim loss.

Log the claim loss, categorised correctly via our easy to use selections and guided for ease of use. Also upload pictures, videos of the loss and track your location.

On demand mobile claim notification ensures nothing is missed and reduces claim processing time if incorrect information was originally submitted by the claimant.

Audit / Inspection

Guided audit and inspection questions online or offline.

For use by anyone at anytime. Our self-audit feature can also be used by third party auditors. Guided question sets focus on identifying defects, setting key actions to resolve (manually via the app or automatic workflow) and uploading evidence of pictures, video with built in location tracking along with online or offline capability (in case there is no mobile signal.)

Mobile audit frees up your paper based report and decreases the time to complete but most importantly keeps you diligent and compliant with follow up key actions of resolution.

Crisis Response

Instantly invoking legal privilege and raising the crisis alert when you need it most.

A serious data breach? A fatality on your premises? The media camped outside your building? Decisions that are made in the first hours of a crisis often have impacts that resonate for years personally and reputationally.

A crisis is a time for clear thinking; we facilitate order, from the moment you activate your Crisis Response mobile app, backed by the DWF Law Crisis team, our notify solution alerts all pre-identified key people, enables legal privilege and has a full audit of activity for tracking/traceability of a timeline of events/actions.

Policy, and compliance and risk assessment document distribution

Distribute and track your key up to date checklists or compliance documentation.

Tracking who has received, digested and understood the latest risk, policy or compliance documentation (usually via email) is a tall order. Using our EvoNotify app you can link/upload your core documentation or compliance checklists to our app then instantly distribute the latest versions to all teams, employees or sub-contractors.

You can then track when it is delivered, and whether they have opened and confirmed they have digested the material. Keeping you and your business compliant and continuously improving.

“You’re in good company”

Accreditations and Best Practice

DWF EvoNotify integrates with a robust suite of market-leading products, pre-built and ready to be configured to your organisation's needs.

All of our products are built on our EvoSuite platform which offers cost to build benefits through a bespoke configuration approach. You can use our platform to solutionise and rapidly configure a system to your own business needs creating a 100% fit, at an enterprise level.

About us

We are a global legal business, transforming legal services through our people for our clients.

Led by Managing Partner and CEO Andrew Leatherland, we have over 27 key locations and 3,100 people delivering services and solutions that go beyond expectations.

By questioning traditions and thinking beyond conventions, we achieve outstanding levels of innovation. We have received recognition for our work by The Financial Times who named us as one of Europe's most innovative legal advisers.

DWF 360, our IT solutions and software business, is part of Connected Services, a specialist division of DWF offering

a range of stand-alone consultative services, technology and products in addition to the traditional legal offering.

We connect on a global scale, sharing our knowledge and technical expertise to identify and anticipate challenges. We are finding new solutions for clients within eight core sectors including Energy and Industrials, Financial Services, Insurance, Public Sector, Real Estate, Retail, Food & Hospitality, Technology and Transport.

Join us on our shared journey to redefine legal services and you'll benefit from the most innovative thinkers, technical experts and sector specialists.

DWF: Transforming legal services through our people and our clients.
